Canadian Data Report of Fisheries and Aquatic Sciences

Data reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of data reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries and aquatic sciences.

Data reports are not intended for general distribution and the contents must not be referred to in other publications without prior written authorization from the issuing establishment. The correct citation appears above the abstract of each report. Data reports are abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Numbers 1–25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26–160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was introduced with the publication of report number 161.

Data reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out-of-stock reports will be supplied for a fee by commercial agents.

Rapport statistique canadien des sciences halieutiques et aquatiques

Les rapports statistiques servent à classer et à archiver les compilations de données pour lesquelles il y a peu ou point d'analyse. Ces compilations auront d'ordinaire été préparées à l'appui d'autres publications ou rapports. Les sujets des rapports statistiques reflètent la vaste gamme des intérêts et des politiques du ministère des Pêches et des Océans, c'est-à-dire les sciences halieutiques et aquatiques.

Les rapports statistiques ne sont pas destinés à une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports statistiques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annuel des publications scientifiques et techniques du Ministère.

Les numéros 1 à 25 de cette série ont été publiés à titre de relevés statistiques, Services des pêches et de la mer. Les numéros 26 à 160 ont été publiés à titre de rapports statistiques du Service des pêches et de la mer, ministère des Pêches et de l'Environnement. Le nom actuel de la série a été établi lors de la parution du numéro 161.

Les rapports statistiques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

ABSTRACT

O'Neil, S.F. and D.A.B. Swetnam. 1991. Collation of Atlantic salmon sport catch statistics, Maritime Provinces, 1951-59. Can. Data Rep. Fish. Aquat. Sci. No. 860: ix + 259 p.

The progressive decline of Canadian east-coast Atlantic salmon stocks has generated a need for more accurate and concise catch and effort information. This need has prompted the production of this report, covering the period 1951-1959, which is the fourth in a series of reports detailing Atlantic salmon angling data on Maritime rivers.

The data used were collected by Conservation and Protection officers of the Department of Fisheries and Oceans.

Numbers and weights of fish angled, as well as numbers of rod-days expended, are included for kelts and bright fish, broken down, where possible, into grilse and large salmon for individual rivers, river systems, statistical districts, counties, salmon management zones (fishing areas), provinces, regions, NAFO divisions and the Maritimes as a whole.

Key words: Atlantic salmon (*Salmo salar*), sport fishing, rod-days, kelts, grilse, salmon fishing area, statistical districts, Maritimes.

L'épuisement progressif des stocks de saumon atlantique sur la côte est du Canada a donné naissance à un besoin de renseignements concis et plus précis sur les prises et l'effort de pêche, d'où l'idée de produire le présent rapport pour les années 1951-1959. C'est le d'une quatrième et série de rapports détaillés sur la pêche au saumon atlantique dans les cours d'eau des provinces Maritimes.

Les données utilisées ont été recueillies par les agents de conservation et de protection du ministère des Pêches et Océans.

Le nombre et le poids des poissons capturés ainsi que le nombre de jours consacrés à la pêche y sont inclus pour ce qui est des charognards et des poissons brillants, de même que la répartition si possible des grilse et des saumons pour chaque flueve, réseau fluvial, division statistique, comté, zone de pêche du saumon, province, région, division de l'OPNA et l'ensemble des Maritimes.

Introduction

This data report is the fourth in a series produced to provide a monthly breakdown of Atlantic salmon sport catch and effort statistics over a number of years. Three previous reports (Swetnam and O'Neil 1985; O'Neil and Swetnam 1994; Swetnam and O'Neil 1984) reported catch and effort for the years 1960-83. This report provides data on Maritime Province rivers for the years 1951-1959. Prior to 1951, salmon sport catch data were not routinely collected.

The data were obtained from monthly angling reports completed by Fisheries and Oceans field personnel (Fig. 1). Although every effort was made to ensure the integrity of the data, the variety of techniques suggests that "approximate" would best describe their accuracy as a whole. Fishery officers were occasionally transferred after only a short one-to-three-year stay in a location, so may have been unfamiliar with the Atlantic salmon sport fishery on which they were reporting. The techniques employed for data collection varied, depending on area, budgetary and manpower constraints and officer priorities. Some of the techniques used were camp and Crown Reserve angling records, word-of-mouth reports, contact with anglers and arms-length estimates based on an officer's personal knowledge of the fishery. Nevertheless, the data will approximate actual catch and effort and the trends should be indicative of fluctuations in availability of fish to the angler and in effort expended between years and rivers.

Data in this report have been carefully compared with previous summaries and any discrepancies checked with the original source. Consequently, information in the current report should be considered the most up-to-date.

The statistical portion of this report is divided into nine sections, each a separate type of breakdown or summary of angling data on the various rivers as follows: Section 1 - individual rivers, listed alphabetically with map index number; Section 2 - "river systems", which include condensed data for six river systems; Section 3 - statistical districts; Section 4- counties by province; Section 5 - Salmon Management Zones (Salmon Fishing Areas); Section 6 - provinces; Section 7 - Scotia-Fundy Region and the Maritime Provinces portion of the Gulf Region; Section 8 - NAFO subdivisions; and Section 9 - The Maritime Provinces as a whole.

In each case, the data which are presented include: the numbers and weights of kelt and bright large salmon and grilse by month for each year; effort in rod-days; and the catch per unit of effort (CPUE), or number of fish per rod-day. A kelt is a salmon in the spent or spawned-out condition prior to its re-entry into salt water (Allan and Ritter 1977) and a bright fish is a maturing salmon that has spent at least one winter at sea.

Note that the distinction between large salmon and grilse was not made by field staff prior to 1965. Consequently, catch was placed in the large salmon or grilse category based on average weight. After 1965, the convention employed by Conservation and Protection Division staff for the classification of an angled fish as either a large salmon or grilse was its weight. Salmon weighing over 2.27 kg (5 pounds) were classed as large salmon and those 2.27 kg or under as grilse. For the purpose of this report, the same 2.27 kg distinction was used for reporting catch, based on average weight, either as large salmon or grilse. A footnote has been included on alternate pages within the body of the report to point out the difficulty in distinguishing between large salmon and grilse.

Effort is reported as number of rod-days. A rod-day is defined as one individual fishing a river for any portion of a single day.

Fishery officer reports were not available for all rivers for all years. In cases where no catch or effort was reported for a particular river, the year was not included.

On some rivers, both kelt and bright fish were angled during the same month, usually May. Fishery officer catch and effort reports did not sub-divide the number of rod-days devoted to catching each year class of salmon within the month. Thus, for the individual river section, the total effort for that month has been reported for both kelts and bright fish. In the remaining sections, however, these rod-days were added to effort which could be assigned specifically to kelts or bright fish to arrive at that monthly total.

Presentation of the data by various geographic boundaries necessitated the establishment of some criterion for river placement. The criterion employed was the location of the river mouth on a topographical map (1:50,000 series); in some cases, the coordinates of the river mouth were obtained from the appropriate provincial gazetteer. In cases where a river was used as a boundary line or

crossed one or several boundary lines, the data were incorporated into the geographical sub-division containing the mouth of the river. In the "counties" section, however, for the Saint John and Southwest Miramichi rivers, the actual sport catch and effort which occurred within the county boundary is summarized. For the "river system" portion of the report, all rivers were included which supported a sport catch and had at least one tributary, irrespective of district or county boundaries, which also had a sport catch.

In cases where rod-day estimates were not available for individual months for a river, NA was inserted instead. When combining river data into groups, incomplete rod-day totals are indicated by an asterisk. (A footnote on applicable pages indicates where information is missing). This has the effect of inflating the catch per unit of effort and this is also noted by an asterisk. Reference may be made to the constituent rivers if more information is desired on which rod-days are missing. If, for any month within one of the summary groups catch data are given but no rod-days are available, then NA is printed for that month and no yearly total given.

Due to inconsistent reporting over the decade covered, the data from some river tributaries and nearby streams were combined into one watercourse. The Little River, Gloucester County, was combined with the Middle River, Gloucester County; and the Gaspereau River in Westmorland County includes the Baie Vert and Timber rivers.

An annual summary of catch and effort, by river, without the monthly breakdown, was previously published for the years 1951-79 (Smith 1981).

DESCRIPTION OF NORTHWEST ATLANTIC FISHERIES ORGANIZATION DIVISIONS[1]

Division	Description
4T	That portion of the Sub-area lying between the coasts of Nova Scotia, New Brunswick and Quebec from Cape North to Pte. des Monts and a line described as follows: beginning at Pte. des Monts, thence due east to a point at 49°25' north latitude, 64°40' west longitude, thence along a rhumb line in a southeasterly direction to a point at 47°50' north latitude, 60°00' west longitude, thence along a rhumb line in a southerly direction to Cape North, Nova Scotia.
4V	That portion of the Sub-area lying between the coast of Nova Scotia between Cape North and Fourchu and a line described as follows: beginning at Fourchu, thence along a rhumb line in an easterly direction to a point at 45°40' north latitude, 60°00' west longitude, thence due south along the meridian of 60°00' west longitude to the parallel of 44°10' north latitude, thence due east to the meridian of 59°00' west longitude, thence due south to the parallel of 39°00' north latitude, thence due east to a point where the boundary between Sub-areas 3 and 4 meets the parallel of 39°00' north latitude, thence along the boundary between Sub-areas 3 and 4 and a line continuing in a northwesterly direction to a point at 47°50' north latitude, 60°00' west longitude, and thence along a rhumb line in a southerly direction to Cape North, Nova Scotia. Division 4V is divided into two Subdivisions: 4Vn - Northern Subdivision - That portion of Division 4V lying north of the parallel of 45°40' north latitude; 4Vs - Southern Subdivision - That portion of Division 4V lying south of the parallel of 45°40' north latitude.
4W	That portion of the Sub-area lying between the coast of Nova Scotia from Halifax to Fourchu and a line described as follows: beginning at Fourchu, thence along a rhumb line in an easterly direction to a point at 45°40' north latitude, 60°00' west longitude, thence due south along the meridian of 60°00' west longitude to the parallel of 44°10' north latitude, thence due east to the meridian of 59°00' west longitude, thence due south to the parallel of 39°00' north latitude, thence due west to the meridian of 63°20' west longitude, thence due north to a point on that meridian at 44°20' north latitude, thence along a rhumb line in a northwesterly direction to Halifax, Nova Scotia.
4X	That portion of the Sub-area lying between the western boundary of Sub-area 4 and the coasts of New Brunswick and Nova Scotia from the terminus of the boundary between New Brunswick and Maine to Halifax, and a line described as follows: beginning at Halifax, thence along a rhumb line in a southeasterly direction to a point 44°20' north latitude, 63°20' west longitude, thence due south to the parallel of 39°00' north latitude, and thence due west to the meridian 65°40' west longitude.
